

Otoole Omega Sound

Price list

Package	Price	Included
1. Speaker Fault Call-Out	£100	A focused service visit for a small sound system problem, connection issue or equipment check. Suitable for one room or a single affected zone. • System and connection inspection • Basic fault finding • Minor adjustment or reconnection • Playback test
2. Single-Room Audio Setup	£400	Installation of a straightforward sound system in one room, such as a lounge, office or small studio. The package covers equipment positioning, connections and initial configuration. • One-room layout • Up to two speakers • Source and amplifier connections • User demonstration
3. Home Entertainment Sound	£900	A larger domestic setup for a living room, media room or garden-facing entertaining space. We install and configure multiple speakers with the selected playback equipment. • Up to four speakers • Amplifier or powered speaker setup • Concealed or tidy cable routing • Sound balance and playback testing
4. Small Venue Background Audio	£2,250	A background music system for a café, salon, shop or small hospitality venue. The system is arranged to provide consistent audio across the main customer area. • Multi-speaker coverage • Commercial playback source connection • Amplifier and zone setup • Basic staff handover
5. Pub and Restaurant Music System	£3,250	A coordinated sound installation for a pub, restaurant or similar venue with separate front-of-house areas. We plan speaker positions and controls around customer seating and staff use. • Multiple audio zones • Ceiling or wall speaker installation • Independent zone volume control • Cable routing and commissioning
6. Function Room Audio Package	£4,750	A flexible sound system for a function room, community hall or event space requiring music and speech playback. The setup supports practical control of microphones, sources and room coverage. • Main speaker system • Mixer and microphone connections • Music source integration • Room testing and operator handover

Package	Price	Included
7. Multi-Zone Hospitality Audio	£7,200	A larger installation for a hotel, leisure venue or busy hospitality site with several customer areas. Each zone is planned for suitable coverage and straightforward day-to-day control. • Multiple independently controlled zones • Distributed speaker installation • Central equipment and source connections • System labelling and handover
8. Commercial Building Sound System	£9,800	A coordinated audio installation for a larger commercial property such as a venue, retail building or managed workspace. The scope covers several rooms or floors with centralised equipment and planned cabling. • Building-wide audio layout • Multiple amplifiers and zones • Paging, music or announcement inputs • Full system testing and documentation
9. Whole-Building Audio Installation	£13,500	A substantial sound system for a large commercial or public-facing building requiring broad coverage, multiple control areas and an integrated equipment layout. We coordinate the installation across the building and hand over the tested system for operational use. • Whole-building speaker coverage • Central rack and distribution equipment • Multiple source and control points • Commissioning across all zones
